EXPERIENCE

WSECU, Olympia, WA — Website Coordinator

August 2020 - Present

Helping credit union members champion their financial well being by creating web pages utilizing an enterprise level CMS, as well as participate in agile/scrum meetings on a daily basis, as a stakeholder. Also utilize HTML5, CSS3, and Bootstrap to design responsive layouts inside the CMS.

Digital Business DesignZ LLC, Olympia, WA — Owner

August 2014 - August 2020

Developed websites, utilizing WordPress, HTML5, CSS3, Javascript, jQuery, PHP, & Bootstrap, as well as managed organic SEO campaigns for small to midsize businesses. Oversaw several independent contractors on various projects related to web design and development. Also orchestrated social media marketing campaigns that increased inbound traffic to clients' websites.

Apple, Tacoma, WA — Technician

November 2011 - August 2014

Worked as part of a team to troubleshoot, & repair iOS & OS X devices at the Tacoma Apple Store. Learned the power of resourcefulness & "learning on the fly". Communication skills were put to the test here, by having to convey complex & technical ideas into terms any customer could easily understand.

EDUCATION

Western Washington University, Bellingham, WA — BA Communication Major, Philosophy Minor

September 2005 - December 2009

As part of both Western Washington University, and Fairhaven, I earned more than just a degree in communication. I explored and pursued my passions while taking many philosophy classes which challenged me to think logically, analytically and "outside the box". Participated in a wide variety of communication classes that were centered around subjects such as media literacy and interpersonal skills. These classes taught me a great deal, but especially to work in groups as both a leader, and a team player.

edX.org, Online - Front End Development Certification

January 2019 - January 2020

Taught by a team of Microsoft staff and members of the W3C, these courses challenged the way I think. I now have an in-depth understanding of the latest in web technologies. Also used tools such as codecademy, and LinkedIn Learning.

SKILLS

Excellent verbal and written communication skills.

Proven ability to thrive in a fast paced work environment.

Extremely self-motivated.

Creative, analytical thinking capabilities.

Passionate about web based technologies, growing and writing code.
